First Aid | General Information

i Did you know?

Through its DIN regulations, the legislator defines the minimum requirements of first aid kits and dressing materials for the various fields of application. Both in road traffic and in companies, schools and kindergartens and in professional use, compliance with these stan-

dards is regularly monitored by the respective responsible bodies (BG, police, etc.).

In the following you can inform yourself about the regulations and standards that apply to you.

So that you are prepared for every eventuality:

Legal Basis

- The Occupational Insurance Association as an autonomous legislation enacts accident prevention regulations (German: SGB VII § 15).
- **The employer must ensure that the required facilities and materials as well as the required personnel needed for first aid and rescue from danger are available (UVV BGV A1 §24).**
- **The employer must ensure that rescue equipment and rescue transportation is kept in readiness**, taking into account the operational conditions (German: BGV A 1 § 25 UVV).
→ Comments hereto in the BG rules BGR A 1 § 24 and 25, section 3.
- Success and quality of first aid often depend on the use of the appropriate medical aids. It is the **responsibility of the entrepreneur to determine the kind, quantity and storage location**. Kind and quantity as well as the storage location of the first aid material depend on the company size, the existing operational risks, the extent and structure of the company.
→ Helpful information can be found in the BG information 509, first aid in companies, chapter 3.5 to 7.5 as well as in annex 1 and ASR A4.3.
- Even within a company the requirement profiles of first aid equipment as well as the risks of injury can differ greatly. Each industry has different requirements and risks. **Therefore the responsibility for the proper selection of first aid material lies with the entrepreneur.**
- As a basis for the occupational first aid system DIN standards are **merely an indication of the minimum requirements with regard to equipment quantity and equipment quality**, e.g. of first aid boxes. DIN 13 157 and DIN 13 169 can be considered as basic equipment. More extensive content or higher equipment quality - especially in regard to dressings - is always recommended.

i Did you know?

GRAMM medical has developed special solutions, which are adapted to the different requirements of the individual industries. The entrepreneur can select thereby exactly the first aid equipment, which was arranged and cut for its business form particularly.

In the First Aid series SPECIAL from **GRAMM medical** the user/consumer always finds the appropriate and necessary equipment for his business. → Products for this can be found starting on page 09.

DIN 13 157 + DIN 13 169

Recommended contents of dressing containers for occupational safety

This must be present in every company. Corresponding You will find regulations on this in the next pages.

→ You can find products starting on page 07

DIN 13 164

Car first-aid boxes/bags,
Car combination bags

Legal obligation to carry in motorized vehicles. The regulations can be found in the Road Traffic Regulations (StVO).

→ You can find products starting on page 51

DIN 13 157 + DIN 13 160

For schools and kindergartens

First aid boxes/bags with these standards can be used in schools and kindergartens stationary or on excursions. The regulations can be found in booklets of the legal accident insurance. (GUV 20.26 - 20.38, GUV SI 8065)

→ You can find products starting on page 59

DIN 13 167

Motorcycle first aid bags

Not mandatory in Germany prescribed, because according to the Ministry of Transport not enough storage space in the motorcycle.

→ You can find products starting on page 52

ISO 20 471

Company vehicles / high visibility

Carrying a high visibility vest in a commercial vehicle is mandatory according to the Employer's Liability Insurance Association (BGF). (UUV vehicles BGV - D29)

! Since 01.07.2014 there is also a warning vest obligation for private cars in Germany.

→ You can find products starting on page 53

DIN 14 142 + DIN 13 164

Rescue vehicles

Special fillings for patient transport and road transport with dangerous goods (GGVS).

→ You can find products starting on page 53

First Aid for Office + Business

i Did you know?

Comprehensive and up-to-date first aid equipment is part of every business, regardless of the industry. First aid kits and first aid cabinets with equipment according to DIN 13 157 and DIN 13 169 differ only in the amount of first aid materials they contain, not in the type. Depending on the industry and the number of employees, an adequate first aid kit is needed.

i Our Tip

During operation, a dry, cool and easily accessible place where the first aid kit or first aid box is stored should be specified. The contents should also be checked regularly for completeness and expired dressing materials should be replaced.

Recognizing the required DIN standard

The following tables show which first-aid equipment you need for your operation. A large first aid kit with filling according to DIN 13 169 can be replaced by two first aid kits DIN 13 157.

Small first aid kit with dressing material filling according to DIN 13 157

Business type	Number of employees	DIN standard
Administration and trading companies	1 to 50 employees	1 first-aid box DIN 13 157
Production and processing plants	1 to 20 employees	1 first-aid box DIN 13 157
Construction sites	1 to 10 employees	1 first-aid box DIN 13 157

Large first aid kit with dressing material filling according to DIN 13 169

Business type	Number of employees	DIN standard
Administration and trading companies	51 to 300 employees 300 additional employees each	First aid box DIN 13 157 additional 1 first-aid box DIN 13 169
Production and processing plants	21 to 100 employees per 100 additional employees	First aid box DIN 13 169 additional 1 first-aid box DIN 13 169
Construction sites	11 to 50 employees 50 additional employees each	First aid box DIN 13 169 additional 1 first-aid box DIN 13 169

! Important

According to BGI 544-1, companies of all kinds are obliged to keep a manual for the documentation of industrial accidents. The manual of associations and further information can be found on page 20.

Industry-Special Cabinets

Metal Industry-Special Cabinet WORKSHOP / CAR

Single-door first-aid cabinet made of robust sheet steel, stove-enamelled, two adjustable shelves, safety lock with two keys, equipped according to DIN 13 157 plus industry-typical special supplement for the car and workshop area.

Dimensions: approx. 400 x 110 x 455 mm Color: white, with first aid symbol
Material: robust sheet steel weight: 6,8 kg

Art.Nr.	Version	PU
418.036.00601	first aid cabinet with contents according to DIN 13 157 + supplement	1 pc.

Metal Industry-Special Cabinet FOOD INDUSTRY

Single-door first-aid cabinet made of robust sheet steel, stove-enamelled, two adjustable shelves, safety lock with two keys, equipped according to DIN 13 157 plus industry-typical special supplement for the food sector.

Dimensions: approx. 400 x 110 x 455 mm Color: white, with first aid symbol
Material: robust sheet steel weight: 6,5 kg

Art.Nr.	Version	PU
418.036.00602	first aid cabinet with contents according to DIN 13 157 + supplement	1 pc.

Metal Industry-Special Cabinet LAB + CHEMISTRY

Single-door first-aid cabinet made of robust sheet steel, stove-enamelled, two adjustable shelves, safety lock with two keys, equipped according to DIN 13 157 plus industry-typical special supplement for the laboratory and chemical sector.

Dimensions: approx. 400 x 110 x 455 mm Color: white, with first aid symbol
Material: robust sheet steel Weight: 6,9 kg

Art.Nr.	Version	PU
418.036.00603	first aid cabinet with contents according to DIN 13 157 + supplement	1 pc.

Plastic First Aid Cabinet

Plastic First Aid Cabinet

Single-door high-quality first-aid cabinet made of impact-resistant plastic, equipped according to DIN 13 157 or empty, ten shelves / four of them removable, safety lock with one key.

Dimensions: approx. 330 x 160 x 450 mm Color: white, with first aid symbol
Material: plastic Weight: empty 2.2 kg, w/ filling 2.9 kg

Art.Nr.	Version	PU
418.035.09000	First aid cabinet with contents according to DIN 13 157	1 pc.
400.035.09000	Cabinet, empty	1 pc.

First Aid | Emergency bags / Emergency backpacks

Emergency Backpack SMALL RED

Emergency backpack small RED - Our smallest
 Teflon® SHIELD+ material with beading effect
 Water repellent
 dirt-repellent
 Special, robust zippers for use in the rain
 Gray inner lining for easy identification of the contents of the backpack
 Sewn-in reflective strips with edge protection
 3 module bags with adhesive Velcro strips and transparent film to fix in
 Backpack

Dimensions: approx. 200 x 180 x 300 mm Color: red
 Material: water-repellent nylon

Art.Nr.	Version	PU
799.000.00047	Backpack, empty	1 pc.
420.018.20005	Backpack with contents according to DIN 13 157	1 pc.
420.018.20006	Backpack with Content Office	1 Stück

Emergency Backpack LARGE

Backpack made of water-repellent nylon, underside made of washable tarpaulin material, reflective strips, incl. 5 module pockets with adhesive velcro strips for fastening in the backpack, 2 divided main compartments. (Contents and refill sets from page 18 onwards)

Dimensions: approx. 400 x 200 x 480 mm Color: red
 Material: water-repellent nylon (also available in tarpaulin on request)

Art.Nr.	Version	PU
400.018.20001	Backpack, leer	1 pc.
418.018.20002	Backpack with contents RESPONDER	1 pc.
418.018.20003	Backpack with contents MEDI	1 pc.

Emergency Bag OFFICE

Bag made of water-repellent nylon, reflective stripes, main compartment with fixed internal division, two external pockets and shoulder strap. (Contents and refill sets from page 18)

Dimensions: approx. 450 x 240 x 200 mm Color: red
 Material: water-repellent nylon (also available as tarpaulin on request)

Art.Nr.	Version	PU
400.018.20012	Emergency Bag, leer	1 pc.
420.018.20012	Emergency bag with contents according to DIN 13 157	1 pc.
420.018.20013	Emergency bag with contents OFFICE	1 pc.

First Aid Bags

ACTIOMEDIC® First Aid COMPACT Mechanic

Compact first-aid bag made of robust nylon, GRAMM quality bandage material filling from certified production, contents especially for mobile use in assembly, including ACTIOMEDIC® quick bandage, for the treatment of minor injuries in seconds.

Dimensions: approx. 200 x 150 mm Color: red
Weight: 168 g

Art.Nr.	Version	PU
420.118.00001	First aid kit for mechanics	10 pcs.

ACTIOMEDIC® First Aid COMPACT Handyman

Compact first-aid bag made of robust nylon, GRAMM quality bandage material filling from certified production, contents specially designed for mobile use in the trade, including ACTIOMEDIC® quick bandage, for treating minor injuries in seconds.

Dimensions: approx. 200 x 150 mm Color: red
Weight: 168 g

Art.Nr.	Version	PU
139.999.70000	First aid handyman first aid kit	10 pcs.

First Aid Softbox with handle according to DIN 13 157

Sturdy, robust and lightweight softbox, in space-saving format with carrying handle, with all-round zipper and transparent inner divider for optimum access and immediate overview, equipped with GRAMM quality dressing materials according to DIN 13 157, all contents labelled in several languages and provided with illustrations for easy use.

Dimensions: 250 x 90 x 175 mm Weight: 850 g

Art.Nr.	Version	PU
420.035.13157	First Aid Softbox with DIN 13 157 filling	8 pcs.

First Aid | DIN Dressing Material Fillings

i Did you know?

The DIN standards for dressing material fillings specify which first aid equipment is required for which area. For example, DIN 13 164 specifies exactly which first aid materials must be contained in the vehicle first-aid bag or first-aid box.

The standard sheets for DIN 13 157 and DIN 13 169, on the other hand, specify the correct first-aid equipment for companies and workplaces.

The ordinance on workplaces (ArbStättV) and the accident prevention regulations require compliance with these standards. Used dressing materials must also be included in the first aid kit to be replaced like expired sterile products.

Play it safe when buying dressing materials: Trust in our experience and tradition in medical device manufacturing since 1909. When you buy dressing materials and medical products always pay attention to the origin!

GRAMM medical quality dressing material fillings are user friendly and reliable.

Only products from certified manufacturers guarantee the necessary quality and safety. Because only if the production takes place in Europe or the manufacturer has a European representation, the products are marketable according to the German Medical Devices Act.

First Aid | Information Signs + Stickers

i Did you know?

On the subject of safety marking, extract from the ASR A 1.3, 5.1 (4):

The ASR contain the concrete instructions for the implementation of the Arbeitsstättenverordnung (ArbStättV). This applies to companies and public institutions in Germany and has legal force.

The appearance of safety signs and escape route signs is determined by DIN 4844, to which ASR A1.3 refers.

Safety signs must be clearly visible and permanently attached. Clearly recognizable means, among other things, that safety

signs must be attached at a suitable height - fixed or movable - and that the lighting (natural or artificial) at the place of attachment is adequate. Prohibition, warning and mandatory signs should be placed visibly and taking into account any obstacles at the entrance to the danger zone. Especially in long rooms (e.g. corridors), rescue or fire protection signs should be visible at all times in the direction of travel (e.g. angle signs).

On the following catalog page you will find an extract of the common safety markings. Further markings on request.

Accident Documentation Book / Emergency Board

First Aid | Medical Room Equipment

i Did you know?

In workplaces with a large spatial extension, stretchers must be available in easily accessible places. Stretchers must be provided in accordance with § 6 para. 4 of the ArbStättV and ASR as well as the requirements of the Maternity Protection Act. According to § 25 para. 4 BGV A1, the employer has to ensure that a first-aid room or a comparable facility is available at an operating site with

more than 1,000 employees (on construction sites with more than 50 employees).

This also applies to companies with less than 1,000 employees but more than 100 employees if the nature, severity and number of accidents require a separate room for first aid.

Stretchers

Eye Wash | First Aid for the Eyes

Every second counts: Protection for your most important sense organ

i Did you know?

Our eye is a masterpiece of nature and the most important sense organ of man. Only the interaction of many small parts in this sensitive organ makes vision possible.

More than 90% of all sensory impressions are received through the eye. Reason enough to pay special attention to this sensory organ - and to make provisions for the worst case scenario.

Just a few seconds can make the difference between impaired vision and, in the worst case, loss of vision. In the case of an eye injury caused by foreign bodies or chemical burns, seconds can be lost. If first aid is not given immediately and consistently in such a case, the eye can suffer permanent irreparable damage. Every year, eye injuries are one of the most frequent accidents reported by the professional associations. Precaution and prudent action is of great importance here.

GRAMM medical offers here different solutions, which are mobile and stationary applicable and are cut to the kind of the job as well as the size of the enterprise. The variety of our products guarantees you an optimal solution, which is suitable for every working environment.

Our eye wash concept is developed in such a way that every user can use it easily and flexibly - without assistance. We guarantee a safe and simple application.

All ACTIONMEDIC® EYE CARE products are CE tested and approved medical products and are constantly subjected to strict quality controls. All products comply with DIN EN 1515-4 (eye showers without water connection).

Do you have any questions? We will be happy to advise you.

Endangered workplaces	Nature of the injury	Eye wash product / effect
Workshops Metalworking companies Industry Woodworking companies etc. Shipyards and mining Civil Protection	Mechanical injury due to foreign body entry, e.g. chips, metal splinters, dirt etc.	Sodium chloride solution, 0.9% → washes foreign bodies from the eye
Chemical laboratories Chemical companies Industry Police Military Fire department and others	Chemical burns, e.g. acids and alkalis	Buffered eye wash solution BioPhos®74 → neutralizes chemicals in the eye

Our high-quality **ACTIOMEDIC® EYE CARE** Eye Wash Bottle

Dust protection cap

Ergonomically shaped eye cup

Content: NaCl 0.9% (sterile)

more information.

This is what the press writes about BioPhos74:

New eye rinsing solution allows highly effective treatment.

...The eye rinsing solution BioPhos74 is highly effective and at the same time very well tolerated. As it is adapted to the extracellular electrolyte ratios (sodium-potassium content) of the tissue, secondary cell damage in the eye area is largely reduced.

Source: Extract 8.2011 | 34. Jahrgang | Rettungsdienst | 713

Special Advantages

Did you know?

Your eye is a masterpiece of nature and your most important sense organ. Only the interaction of many small parts in this organ makes SEEING possible. When working with chemicals, they can enter the eye as solid, liquid or gaseous substances. Therefore, eye protection is very important at work! Please have **BioPhos[®]74** ready in case of an emergency in order to quickly and effectively prevent damage to the eye in case of chemical burns.

BioPhos[®]74 works effectively and maintains the cellular electrolyte equilibrium through the exclusive use of natural substances that are subject to physiological metabolism and especially correspond to the extracellular sodium-potassium ratio.

Areas of Use

The **BioPhos®74** rinsing solution in the 250 ml bottle is versatile and an important part of the first aid kit e.g. for

- **Businesses & Laboratories**
- **Transport of dangerous goods**
- **Emergency Services**
- **Fire department & disaster control**
- **Police & Military**

BioPhos®74 is a useful addition to stationary eye showers, since they are highly concentrated, corrosive and rapidly penetrating chemicals require a rapid intervention time and unbuffered rinsing solutions are not sufficient to ensure an irreversible prevent cell damage.

Effect

The **BioPhos®74** rinsing solution neutralizes immediately due to its buffering effect in the physiological pH-range of 7.4 and is particularly gentle due to the absence of any exogenous components such as preservatives. Since it contains the extra- is adapted to the cellular electrolyte conditions of the tissue, secondary cell damage after rinsing is largely reduced by **BioPhos®74**.

Due to the high buffer capacity **BioPhos®74** acts fast in case of eye burns caused by strong acids and alkaline solutions. The sterile rinsing solution is ready for use in the handy 250 ml bottle for fast initial treatment. The integrated ergonomic rinsing head allows easy and correct application - even for laymen and injured persons without additional help. After application of **BioPhos®74** rinse with physiological sodium chloride solution (0.9%).

Useful information on the correct labelling of eye rinsing solutions according to the Medical Devices Act and the standards for eye rinsing:

Multilingual label available in all European languages

Marking with CE and indication of the monitoring center

Marking the sterility of the product

Indication of the manufacturer or person placing the product on the market

Pictograms for easy and safe use of eye rinsing

Specification of the batch number and the durability of the eye wash solution (GRAMM medical: at least 3 years)

Application - easy and fast

Our ACTIOMEDIC® EYE CARE eye rinses with ergonomic rinsing head are so easy to use:

1. Remove the bottle from the station.

2. Remove the dust protection cap from the eye wash bottle head.

3. Turn eye rinsing bowl by 180° until sealant breaks.

4. Lean back the head, place the eye cup over the eye and rinse.

5. Bend the head forward and rinse if clothing should not get wet.

Please note:

For all soiling, the eye should be rinsed with a soft and even jet.

Gently press the eye rinsing bottle during the rinsing process. Medical advice should be sought for any eye injury or soiling.

Flushing should continue during transport to the doctor. Do not reuse an opened bottle (risk of infection).

Here on request your company logo!

AUGEN-NOTFALLPLAN

Schadstoff-Einwirkung	Empfohlene Spüllösung	Anwendung	Fortsetzung bis zur ärztlichen Behandlung
Fremdkörper z.B. Staub, Schmutz, Metall- und Holzsplitter	Actiomedic Natriumchloridlösung (0,9%)	Augen so lange spülen bis die Fremdkörper herausgewaschen sind.	Spülung mit Actiomedic Natriumchloridlösung (0,9%)
Säureschäden	gepufferte Spüllösung BioPhos®74	Augen mit BioPhos®74 ca. 2,5 Minuten spülen bis die Flasche entleert ist.	Spülung mit Actiomedic Natriumchloridlösung (0,9%)
Alkalische Schäden ausgenommen kalziumhaltige Substanzen, z.B. Kalk und Zement	gepufferte Spüllösung BioPhos®74	Augen mit BioPhos®74 ca. 2,5 Minuten spülen bis die Flasche entleert ist.	Spülung mit Actiomedic Natriumchloridlösung (0,9%)
Sonstige Schäden z.B. Lösemittel und Öle, außer Substanzen, die Silber enthalten	Actiomedic Natriumchloridlösung (0,9%)	Augen so lange spülen bis das unangenehme Gefühl nicht mehr spürbar ist.	Spülung mit Actiomedic Natriumchloridlösung (0,9%)

Entnehmen Sie die Flasche aus der Augenspülstation, bzw. dem Augenspülkoffer

Drehen Sie die Augenschale um 180° in Richtung des Pfeils bis die Versiegelung bricht.

Legen Sie den Kopf in den Nacken und spülen Sie das Auge gleichmäßig.

Beugen Sie sich vor dem Absetzen der Flasche nach vorn um Ihre Kleidung vor Nässe zu schützen.

WICHTIG: Spülen Sie das Auge unabhängig von der Art der Verletzung stets mit einem gleichmäßigen weichen Strahl und halten Sie es dabei weit geöffnet. Drücken Sie die Flasche beim Spülen leicht.

Bei jeder Augenverletzung / -verschmutzung ist unverzüglich ärztlicher Rat einzuholen! Setzen Sie die Spülung unbedingt mit Natriumchloridlösung (0,9%) fort bis ein Arzt konsultiert wurde.

Simultaneous rinsing
Double even irrigation jet for simultaneous and gentle rinsing of both eyes.

Special Advantages

In an emergency, just a few seconds can make the difference between impaired vision and, in the worst case, loss of vision. If first aid is not given immediately and consistently in such a case, the eye can suffer permanent irreparable damage.

GRAMM medical therefore offers you **ACTIOMEDIC® EYE CARE** **TWIN** an eye rinse with which both eyes can be rinsed simultaneously in case of an eye injury.

For double safety and for even faster help in an emergency.

The new **ACTIOMEDIC® Medi2Protect** Eye Wash Station

For even faster and more effective help in an emergency.

Easy to grasp
The large handle makes it easy to use even with gloves in an emergency.

So that it is immediately recognizable whether the eye wash station is filled and ready

Special Advantages

In endangered workplaces such as workshops, metalworking stores or chemical laboratories, eye rinsing solutions must be available according to the workplace ordinance §39.

Here GRAMM medical offers a fast accessible, robust and easy to operate eye rinsing station for wall mounting or for mobile use. The comfortable wall-mounted eye wash station offers easy and fast access to the eye rinsing solution, so that in case of emergency a quick reaction is possible.

The station offers space for up to three **ACTIOMEDIC® EYE CARE** eye wash bottles, which can be combined as required.

A further and very important advantage of our new eye rinsing station is that it can be used flexibly. Mounted on the wall, it is a concrete point of contact for injured persons and thanks to the striking signal color, it is easy to find even with limited vision. As a mobile emergency case, it can also be taken into the danger zone, so that in an emergency, first aid can be given quickly and flexibly directly at the scene of the accident.

Medi2Protect Eye Wash Station

ACTIOMEDIC® EYE CARE Medi2Protect I

Wound Care | Wound Cleaning

i Did you know?

The **ACTIOMEDIC® Wound and Eye Spray** with 0.9% phosphate-buffered sodium chloride solution is the ideal addition to the mobile and stationary first aid equipment. The spray can be easily put into the first aid kit as additional equipment or carried along by its compact size in mobile use.

Uncomplicated and one-handed, it is suitable for cleaning smaller wounds as

well as for washing out foreign bodies in the eyes. The spray does not burn in the wound and sprays in all directions with an even jet.

In contrast to eye rinsing bottles, the wound and eye spray can be used several times and still remains sterile. The protective cap additionally protects the spray head from external soiling.

- ✓ easy, one-handed application
- ✓ multiple use possible - remains sterile
- ✓ including protective cap
- ✓ 0.9% sterile, phosphate-buffered sodium chloride solution
- ✓ hypoallergenic and skin friendly
- ✓ without irritating preservatives
- ✓ multilingual labelling

ACTIOMEDIC® Wound and Eye Spray

Spray for cleaning smaller wounds and washing out eyes. Contains phosphate-buffered sodium chloride solution 0.9%. Multiple use possible - remains sterile. Can be sprayed with an even jet in all directions. Includes protective cap.

Dimensions: 19 x 72 mm, 25 x 72 mm

Contents: 50 ml phosphate-buffered sodium chloride solution 0.9%

Art.Nr.	Version	PU
500.000.40050	50 ml wound and eye spray incl. protective cap	16 pcs.

Plasters | Application

ACTIOMEDIC® Plasters are...

- ✔ **Reliable**
 They stick to the skin as long as they are supposed to hold.
- ✔ **Hypoallergenic**
 Tested skin compatibility you can rely on.
- ✔ **Versatile**
 Available in different sizes, shapes and materials for all applications.
- ✔ **High quality**
 As only tested fabrics, fleeces and foils are processed.
- ✔ **Skin-friendly**
 Because they are tested for skin compatibility.

1 Plaster Strip

2 Finger Plaster

3 Fingertip Plaster

4 Finger Joint Plaster

Quality Features

i Did you know?

ACTIOMEDIC® plasters from GRAMM medical keep their promise.

We offer you a wide range of plasters in the practical large box for commercial use as well as cuttable wound dressings in different versions in a dispenser box.

All ACTIOMEDIC® plasters are medical products and are subject to strict quality controls.

Depending on the design and application ACTIOMEDIC® plasters are divided into five different areas.

ELASTIC: High elasticity, maximum comfort, even in places with a lot of movement.

AQUATIC: Water-repellent, breathable and reliable adhesive.

SENSITIVE: Particularly skin-friendly, super soft fleece fabric for sensitive skin.

DETECT: Detectable for use in the food industry, water-repellent and elastic available.

X-RAY: X-Ray and electro magnetically detectable plasters.

X-Ray Detectable Plasters

i Did you know?

X-Ray plasters are recognized electromagnetically by metal detectors and additionally by X-ray detectors.

X-Ray plasters are:

- hypoallergenic
- X-ray and electromagnetic detectable
- water-repellent or elastic
- breathable

! Note: Before use, make sure that the plasters are applied to your systems can be tested in test operation.

How is this possible? In addition to the aluminum foil, which has proven itself for metal detectors, threads are added which are detected by X-ray machines.

Color: orange, with first aid symbol

Art.Nr.	Version	PU
415.035.08400	Content according to DIN 13 164 + addition	1 pc.

Special First Aid | In Austria

i Did you know?

In Austria, as in Germany, there are standards that define which first aid equipment is required for which area. For example, Austrian legislation under § 26 of the Workers' Protection Act stipulates that optimum first aid must be

provided to a sick or injured worker in every case. The relevant standards for dressing material fillings are called ÖNORM Z 1020 Type 1 and ÖNORM Z 1020 Type 2. In the automotive sector, ÖNORM V 5101 specifies which first aid equipment should be carried in the vehicle.

Required first aid equipment according to ÖNORM

	Beschäftigtenzahl	ÖNORM Vorschrift
for companies and workplaces with	1 to 5 employees	1 first aid kit type 1
for companies and workplaces with	6 to 20 employees	1 first aid kit type 2

If there are more than 20 employees, several first aid kits are required, according to the guidelines for Type 1 and Type 2. The names of the first-aiders and the telephone numbers of the accident reporting offices, doctors and hospitals must be sent to or must be read next to each first aid kit.

First Aid Kit

First aid kit DOMINO with contents according to ÖNORM Z 1020 Type 1

Impact and break-proof dressing case made of ABS plastic, with contents according to ÖNORM Z 1020 type 1, with wall bracket and rubber seal, adjustable interior division, mobile and stationary use, lockable with lead seal

Dimensions: approx. 280 x 115 x 200 mm

Color: orange, with first aid symbol and inscription „First Aid“

Art.Nr.	Version	PU
